update_724

1、区县层面总药店数量变化TWFE：加入prov_id#year固定效应

County TWFE main: county-wide pharmacy outcomes

	(1)	(2)
	Pharmacy count	ln pharmacy count
post_policy	8.380***	0.003
	(2.245)	(0.021)
Natural log of county population	196.873***	-0.537***
	(22.594)	(0.133)
Natural log of mean nighttime lights plus one	44.411***	0.059
	(8.788)	(0.082)
Observations	19274.000	19274.000
Within R-squared	0.077	0.004

Standard errors in parentheses
* $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$

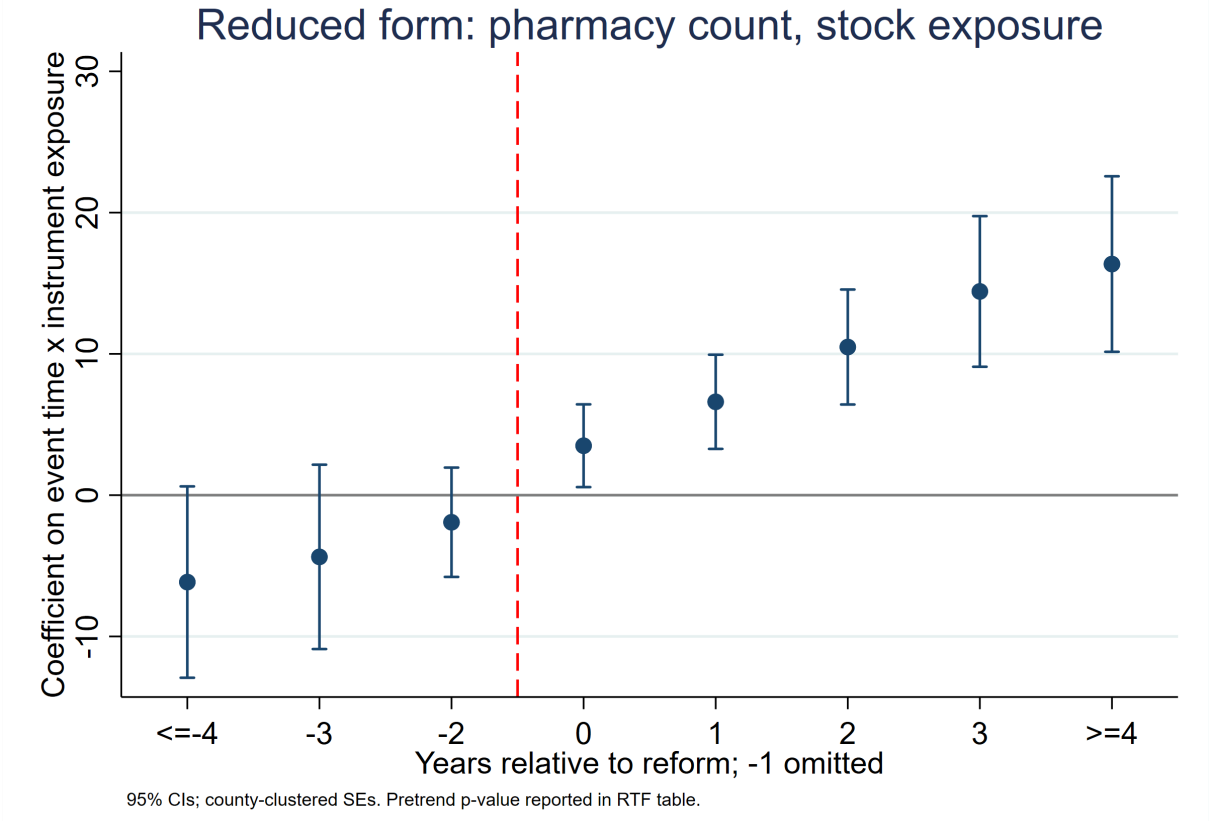

2、Continuous DID IV结果：

instrument baseline public-hospital intensity, 1950s epidemiology-station exposure interacted with post-policy.

County continuous DID IV: 1950s epidemiology-station instruments

	(1) Count: stock IV	(2) ln count: stock IV	(3) Count: station-years IV	(4) ln count: station-years IV
Post x ln baseline public hospitals	60.328***	0.193*	68.753***	0.105
	(13.692)	(0.105)	(15.549)	(0.124)
Natural log of county population	175.210***	-0.616***	169.077***	-0.552***
	(29.811)	(0.176)	(29.298)	(0.181)
Natural log of mean nighttime lights plus one	40.935***	-0.038	39.151***	-0.019
	(11.741)	(0.097)	(11.529)	(0.097)
Observations	15762.000	15762.000	15762.000	15762.000
Kleibergen-Paap F	89.719	89.719	76.020	76.020

Standard errors in parentheses
* $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$

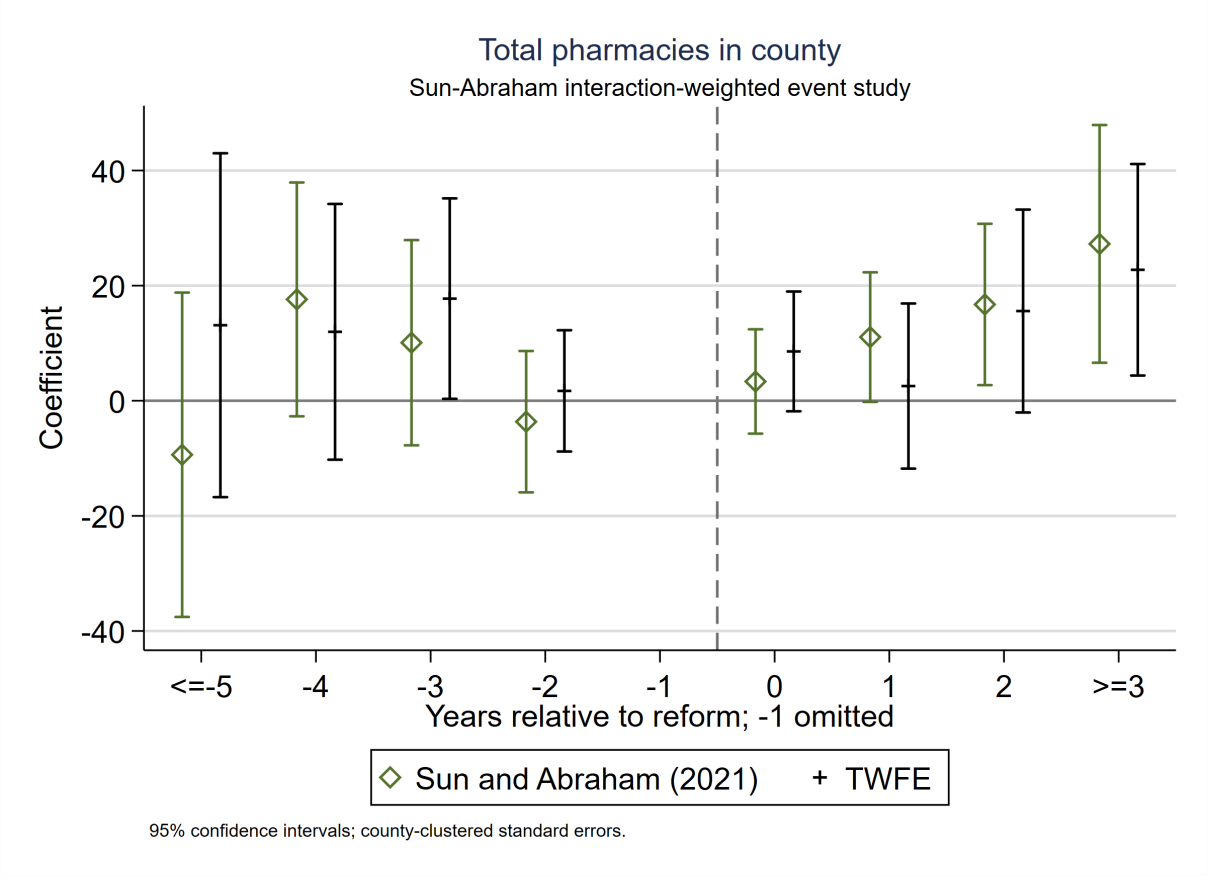

95% CIs; county-clustered SEs. Pretrend p-value reported in RTF table.

3、CSDID结果：ATT= 7.310898 **

4、Sun-Abraham检验

5、区县层面离公立医院距离最近500m/1km/2km的药店变化：显示公立医院周边药店数量增加

County TWFE robustness: alternative near-hospital thresholds

	(1) <=500m	(2) <=1km
post_policy	3.280***	7.577***
	(0.415)	(0.867)
Natural log of county population	14.726***	41.229***
	(2.612)	(5.944)
Natural log of mean nighttime lights plus one	2.811**	8.786***
	(1.323)	(3.005)
Observations	19274.000	19274.000
Within R-squared	0.021	0.033

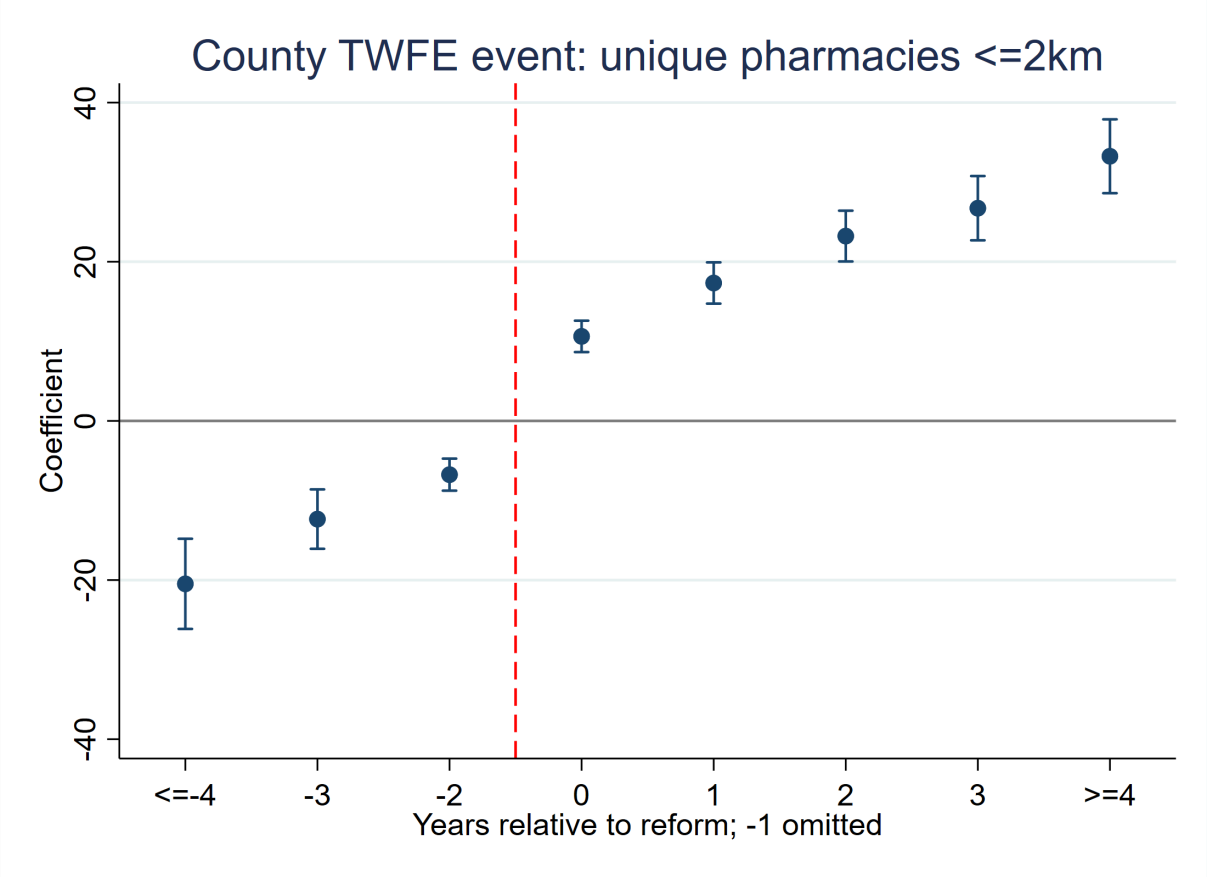

Standard errors in parentheses
* $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$

County TWFE mechanism: unique pharmacies by 2 km threshold

	(1) <=2km	(2) >2km
post_policy	12.498***	-4.118**
	(1.425)	(2.053)
Natural log of county population	98.432***	98.441***
	(11.530)	(18.972)
Natural log of mean nighttime lights plus one	19.403***	25.007***
	(5.065)	(7.303)
Observations	19274.000	19274.000
Within R-squared	0.055	0.024

Standard errors in parentheses
* $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$

平行趋势检验不通过：

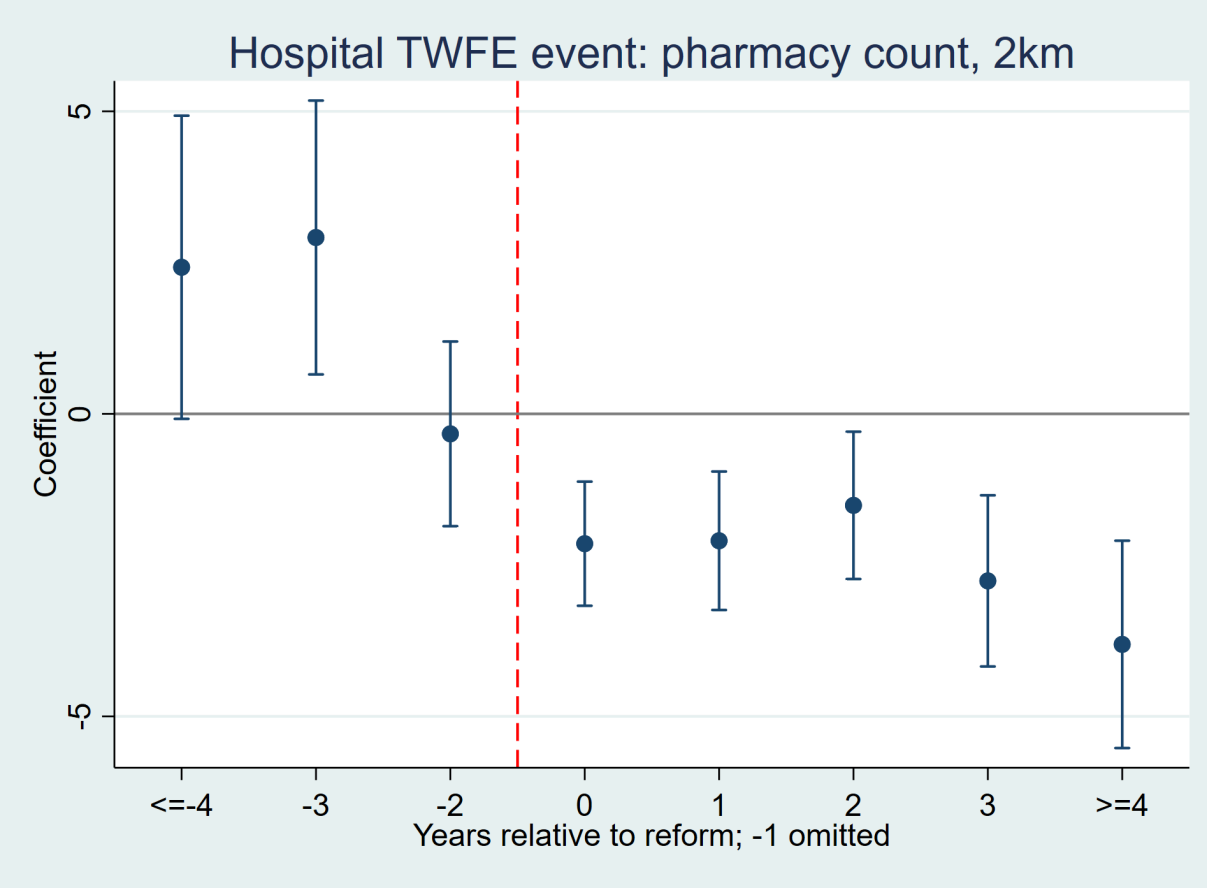

总结：医药改革后区县层面的药店总数量上升，且区县层面离公立医院最近的药店数量增加，但未通过平行趋势检验；医院层面结果显示，相比于民营私立医院，公立医院附近药店数量下降：

Hospital TWFE with province-by-year FE: pharmacy count

	(1)	(2)	(3)
	2km: main	1km: robustness	500m: robustness
Public hospital x post reform	-3.727***	-1.184***	-0.233***
	(0.583)	(0.211)	(0.076)
Post local reform	4.155***	0.817***	0.075
	(0.931)	(0.304)	(0.096)
Observations	138567	138567	138567

Standard errors in parentheses
* $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$

Hospital TWFE event: pharmacy count, 2km
